

Our Midterm Exam will cover sections 1.1-8, 2.1-6, and 2.8-9 in the textbook. It will not cover section 3.1. Please read the following instructions carefully before beginning our Midterm Exam.

- We will meet in **our regular Zoom meeting room** at 2:25pm on Tuesday, 10/13/2020. At 2:30pm I will share a link to a PDF of our Midterm Exam.
- While taking the exam, you should remain in the Zoom meeting with your camera on and your microphone off. If you have a question, you should send me a private chat message (and keep your microphone off so not to disturb other students). If you finish early, you can leave the Zoom meeting after you have uploaded your exam (see instructions below).
- No other assistance of any kind is allowed (e.g. calculators, notes, textbook, internet, friends, tutors, etc.). The use of any form of assistance is a violation of the university's **academic integrity policy**.
- You will take the exam in one of the following ways:
  1. **If you have a tablet**, you can open the PDF of our Midterm Exam and write your name and your solutions digitally directly on the document. At the end of the 75 minute class, save/export your exam with solutions as a single PDF with your name in the filename. Note that some tablet apps by default only export your markups and not the document on which you made those markups. Please be sure you are creating a PDF that contains both the original document (exam) and your markups.
  2. **If you have a printer/scanner**, you can print the PDF of our Midterm Exam and write your name and solutions directly on the printed exam. At the end of the 75 minute class, scan your exam with solutions and save it as a single PDF with your name in the filename. Note that sometimes math symbols do not print correctly when the pdf is opened in a web browser. To prevent this, you should open the PDF in a PDF viewer (e.g. Preview, Adoba Acrobat, etc.) and print from there.
  3. **Otherwise**, you can read the questions from the PDF of our Midterm Exam on your screen and write your name and solutions on blank or lined paper. In this case you do not need to write down the questions if you don't want to, but you need to label your solutions with the question number they correspond to, and they should be in numerical order (question 1, question 2, etc.). At the end of the 75 minute class, use a **mobile scanning app** to take pictures of your papers and turn those pictures into a single PDF file with your name in the filename. If you are inexperienced at this, please practice in advance of the exam.
- Within 15 minutes of completing the exam (i.e. by 4:00pm), **upload your work as a single PDF (with your full name included in the filename) to the following Dropbox request folder.**
